KEYS

RGB lighting

The 16.8M RGB colour stripe is customizable and features three speeds and four lighting stages that can be synchronized with other AOC devices.

Optical Sensor

The Pixart 3325 optical gaming sensor with 5000DPI, a tracking speed of 100 IPS and an acceleration of 20G is the ultimate tool for precision. Your inputs will be translated onto the screen accurately and as rapidly as possible.

DPI Button

The DPI button lets you manually switch between four different DPI settings on the fly and choose the right speed for any given game and playstyle.

Exclusive app

Our exclusive desktop app enables you to have total control over your devices. Set up five different profiles with storable hardware settings and personalize your mouse speed, lighting and button configuration according to your preferences. Choose the RGB lighting's brightness, set up various effects and synchronize it with your other AOC devices.
