

Product name: ENDORFY Ventum 200 ARGB
Product code: EY2A014

If you're looking for a roomy (440×216×373 mm) PC case for your [treasures components](#), the ENDORFY Ventum 200 ARGB is for you. Not only does it keep them pleasantly cool, but it also looks epic. But what else would you expect when a tempered glass window and ARGB fans are included, right?

Among other things, the PC case accommodates a full ATX-size motherboard and 3 2.5" drives (or 1 3.5" and 2 2.5" drives). Additionally, you'll be able to fit a liquid cooling system with a 360 mm radiator on the front panel and a 240 mm radiator on the top. There's also room for [7 fans](#) – including 4 Stratus 120 PWM ARGB fans you get for a good start – with the PWM splitter you can control them from a single motherboard connector.

Cool, cooler, Ventum

Without beating around the bush – the ENDORFY Ventum 200 ARGB is as airy as an air-conditioned room in a five-star hotel. The only difference is that our PC case has beautifully illuminated fans on the front and back panels. And you can arrange the interior however you like.

The ENDORFY Ventum 200 ARGB is, well, airy – the [perforated](#) metal front panel ensures proper airflow, even if you're grinding for hours on ultrahigh settings. With up to 7 fans inside, it's guaranteed to get windy.

The metal front panel of the ENDORFY Ventum 200 ARGB is finely perforated: its holes are less than 0.9 mm in diameter, ensuring good airflow. Thanks to the included set of removable, magnetic filters, the case also protects your build from dust and dirt, while being conveniently easy to clean.

The storm of the century is coming!

At first glance, the ENDORFY Ventum 200 ARGB doesn't take up much space. But the truth is, you can easily rock the storm of the century inside, as our PC case accommodates up to [7 fans](#).

To get you started, we're giving you our 4 favorites – the reliable Stratus 120 PWM ARGB fans, which we developed in cooperation with Synergy Cooling. Thanks to a splitter, you can control them with a PWM signal from a single motherboard connector.

Nothing to hide

It's showtime! The ENDORFY Ventum 200 ARGB is perfect for those who take pride in their hand-picked components and meticulous cable management. Sporting a sturdy tempered-glass window, it gives you a clear view of your prized build.

Small but spacious

It's like a well-designed purse – it might not look like much from the outside (measuring only 440×216×373 mm), but it holds a world ([of components](#)) inside.

Inside the ENDORFY Ventum 200 ARGB, you can easily install a full-sized ATX motherboard, up to 3 2.5" drives (or 2× 2.5" and 1× 3.5", it's up to you), and as many as 7 (seven!) 120 mm fans. With plenty of room inside, you can install a liquid cooling system: 240 mm at the top or even a 360 mm one at the front of the case.
