SM-007 Enforcer

A slightly tinted tempered glass side panel and two dust filters in the top and below the power supply tunnel make the SM-007 Enforcer the ideal candidate for a gaming system in Micro-ATX format.

Five additional fan spaces on the back and top contribute to a well thought-out ventilation concept. The separated power supply tunnel also contains the space for 3.5" hard drives. Dust filters in the top and in the bottom of the case, which are easy to remove and clean, keep the interior of the case free of dust.

Due to the openings in the cage and in the power supply tunnel, all laid cables can be easily and simply hidden behind the mainboard carrier, thus ensures a clean interior.
