

StarryFort SF30

- ▀ 4x SquA RGB Fans Pre-Installed
- ▀ Support Addressable RGB Lighting Synchronization
- ▀ Integrated Hub for 6x Addressable RGB Devices

StarryFort SF30, a mid-tower RGB gaming chassis, contains 4x pre-installed SquA RGB fans, a beautiful RGB LED strip on the side, and an ample tempered glass side window, for users to showcase the precious build with amazing RGB lighting. Furthermore, StarryFort SF30's integrated hub enables users to control 6x addressable RGB devices' lighting in sync through motherboard software or the control button on the chassis. Detachable PSU side cover and removable HDD cage help facilitate installation and cable routing. StarryFort SF30 has got enough space for mid-range gaming rigs and looks modern and brilliant.

Features

▀ Addressable RGB lighting

StarryFort SF30 comes with embedded LED strip on the left side and 4 SquA RGB fans to create colorful rainbow lighting with 16.8 million options

▀ SquA RGB fan

SquA RGB fan offers an incredible visual experience with square-shaped lighting and the gleam through holes around the back of frame. In addition to brilliant RGB lighting, SquA RGB's air Inlet design and Vortex frame help generate more airflow and stronger air pressure for superior cooling efficiency

2 ways to control addressable RGB lighting effects

Through Motherboard Software

Users can sync the RGB lighting with motherboards featuring addressable RGB headers (4 pin assignment : 5V/D/-/G)

Through Computer Case

Users can use the *lighting control button to adjust preferred lighting effects (13 pre-set lighting effects: Rainbow, Snake, Peach & Green scroll, Colors breathe, Colors scroll, Bilateral colors scroll, Red, Green, Blue, White, Yellow, Azure, and Peach.)

- * Long press the **lighting control button** for 2~3 seconds to switch the RGB sync controlled by M/B or case
- * The Reset button located on the front I/O panel is replaced by the **lighting control button**

Integrated hub

For those who do not use the RGB-sync motherboards, the integrated hub allows users to keep 6x addressable RGB devices' lighting in sync
