

WiFi Smart Wall Switch | Curtain, shutter or sunshade controller

General information

Open and close your electric curtains, shutters and sunshades from your smartphone, tablet or with any home voice control devices, such as Amazon Alexa or Google Home. This Smart Curtain Controller can also be set to operate when other Nedis® SmartLife are switched on and off, so your curtains close when a light is switched on, for example.

Easy to set up

The Smart Curtain Controller is simple to set up, connecting wirelessly to your Wi-Fi router and requiring no separate hub.

Discrete

It's sleek and easy-to-clean glass front blends into your interior, and yet this discrete unit is powerful enough to support systems of up to 300 W.

Schedule and pair

The app that provides the brains behind this Smart Curtain Controller allows you to intuitively set time schedules for your curtains (ideal for everyday living and a great security feature if you are away from home for a while) as well as pair it to other products to create your own connected smart home system.

About Nedis® SmartLife

Discover a wide and ever-expanding range of products - such as bulbs, switches, sockets, sensors, and cameras - that can all be controlled through an easy-to-use and intuitive app. With voice control features supported by Amazon Alexa and Google Home, and no need for anything more than your existing Wi-Fi network, this is the connected, smart home made simple.

Whether you're looking for a single smart bulb or socket, or you want to automate your entire house, discover how accessible smart technology is today.
