

Food slicer icaro⁷

selected design

Details

- full metal construction
- silver metallic
- foldable supply table
- serrated blade with polished edge, 17 cm
- slice thickness adjustable up to approx. 14 mm
- two-finger switch-on safety system
- switch for intermittent and continuous operation
- divisible carriage for space-saving storage, even when slicer is folded
- carriage way approx. 20 cm
- food collecting tray
- cable storage
- warranty: 2 years
- product made in Germany

Technical features

230 V, 65 Watt eco-motor, duty cycle 5 minutes
VDE/GS approval, safety category 2, CE

dimensions:
width 24,0 cm (folded 10 cm) height 20,0 cm
depth 34,0 cm
weight: 3,6 kg

Item No. / GTIN

521.000 / 40 04822 52100 8

icaro⁷ food slicer – foldable for storage

With the icaro⁷, the first foldable full metal food slicer, the focus is clearly on functionality since the device can be folded up to save space after use. Folded, the food slicer is just 10 cm wide and can be stored in the cupboard – practical and space-saving. icaro⁷ is thus the perfect food slicer when there's not much space available in the kitchen. Even while in use, the practical device is space-saving on the work surface.

The full metal construction of the food slicer offers particular stability as well as optimal slicing results, which not least also increases the durability of the device. Whether wafer-thin or up to approx. 14 mm thick – everything is sliced evenly into appetizing slices – regardless of whether it's bread, sausage, cheese or even vegetables. The serrated blade, made from stainless steel, ensures the perfect "slice".

More practical details underline the user-friendliness of the foldable food slicer: Thus, the blade can easily be removed for cleaning with no additional tools thanks to a convenient bayonet quick-acting lock. Likewise, the carriage can easily be released and removed for simple cleaning. Even extra-large food items are no problem for the icaro⁷ food slicer thanks to the broad-surfaced metal slicing board.

The two-finger switch-on safety system establishes additional safety while slicing. The full metal food slicer can be used in intermittent and continuous operation as desired.

The food slicer is driven by a powerful 65 Watt eco motor. The use of this energy-efficient motor ensures a positive contribution to the protection of the environment.

Timeless design in a clear Bauhaus look which convinces: the icaro⁷ food slicer has won the renowned iF DESIGN AWARD. With the iF DESIGN AWARD 2015, the jury honored more than just the product. In fact, the award once again confirmed the success of the design tradition with which ritterwerk has been following the ideals of Bauhaus tradition for more than 50 years.

High-quality materials and a perfect manufacturing quality guarantee a long life span for the icaro⁷ – an ideal device for anyone who values a practical and high-quality device as well as "made in Germany" technology.

A smooth ham- and sausage blade is available for every ritter food slicer.

About ritterwerk:

ritterwerk was founded in 1905 by Franz Ritter. Since then the medium-sized company develops and produces household appliances which facilitate the everyday work in the kitchen. The medium-sized company, headed by Michael Schüller, develops designs and produces exclusively in Gröbenzell near Munich. The company's philosophy 'made in Germany' not only stands for its production site in Germany. It also incorporates high quality standards, sustainability, appropriate materials as well as functional design, thus clearly following the 'Bauhaus' principles of the twenties.
