

Cololight PRO

Smart Home RGB LED lighting system with expandable modules for individual design

Whether as relaxing mood light in the living room, exciting party lighting at the bar or as colorful gaming lighting next to the PC or console - the varied lighting is a real eye-catcher for almost any purpose.

Thanks to the innovative plug-in system based on the modular principle, you are completely free in your design. The Cololight Stone Set is an exciting 6pcs LED Set which you can expand it at any time with additional extensions. The large stone base serves as a stylish holder making it easy to place the LED modules anywhere in your home.

Smart app control

Quiet simple colors, exciting color changes, exciting special effects or even whole color motifs such as a Christmas tree, an hourglass, a dancing rainbow effect - with the app control you have unlimited design possibilities but also many prefabricated scenes as an alternative.

Music and light go together like lightning and thunder. That's why every Cololight offers an extensive party mode. The light literally dances to the beat of the music. Whether it's smooth color changes, fast flashing or fast transitions, you can customise the music mode to suit your taste!

Cololight can be easily integrated into existing WLAN networks and can then be operated with a smartphone on the move or via voice control through Amazon Alexa or Google Home. Alternatively, the light can also be controlled at the touch of a button, without a WLAN or smartphone connection.

The free Cololight Smart Home App is available for Android and Apple iPhones and is continuously being further developed and expanded.

Technical details

Material	Plastic
Connection	Wi-Fi (2.4 Ghz)
Android App	https://play.google.com/store/apps/details?id=com.ilifsmart.quantum&hl=de
iOS app	https://itunes.apple.com/de/app/cololight/id1382501135?mt=8
Power supply	USB 5V
Electricity requirement per module	Approx. 0.1A/0.5W (depending on brightness, colour)
Recommended number of modules per USB power pack	5V USB power pack with 1A: up to 10 units 5V USB power pack with 2A: up to 20 units 5V USB power pack with 3A: up to 30 units
