Category 5

Work Better. Feel Better. ™   **Fellowes**

Using a monitor arm means that you can set your screen to be the exact height and angle to improve your health when working. Whether sitting or standing while using a computer, it will improve your ergonomic posture by preventing leaning forward or tiling of the neck, to avoid back, neck and eye strain.
With office space shrinking, using a monitor arm also means you can free up valuable workspace. Maximize your work environment and in-line desk area through elevating your screen with clear space underneath, to become more organized and productive.
Integrated Cable Management
Keep your workspace cluter free

Clamp or Grommet Mount
Provides security and frees up desk space

Integrated USB Ports
making it easy to stay connected

2x
USB

Gas Spring Technology
Offers unlimited effortless adjustment

Platinum Series™ Monitor Arms

Fully independent adjustable monitor arms increase workspace flexibility and collaboration

- Increase valuable desk space and easily adjust your monitor to reduce eye, neck and shoulder strain

- Connect your favorite devices with 2 USB ports conveniently located at the base of the product

Warranty	3 Years Limited	3 Years Limited

Understanding Specifications

USB Connectivitiy

Work seamlessly with all your devices whilst remaining constantly connected with conveniently integrated USB ports.
Rotation

Flexibility to rotate your monitor upto 360˚ and view your screen in either a landscape or portrait position.

Pan

Adjusting the monitor pan by angling the screen either inwards or outwards, allows you to easily achieve the correct position in front of you and reduce eyestrain. Especially useful where you are working with multiple screens.

Tilt

Adjusting the monitor tilt upwards or downwards allows you to easily achieve the optimum angle of your screen for improved posture and decreased tension in your neck.
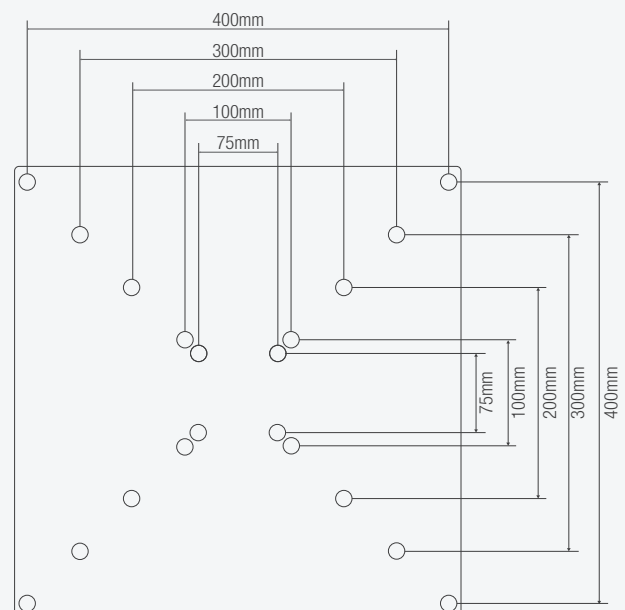

VESA Compliance

Most monitors have a VESA hole pattern on the back of the screen. VESA stands for Video Electronic Standard Association and is the industry benchmark used by worldwide manufactures of flat screen monitors.

On these VESA compliant screens you will find a square or a rectangle shaped group of 4 attachment holes, on the backside of the screen (such as one of the patterns illustrated in the diagram pictured).
Fellowes mounting solutions are all designed to fit these various VESA standards.
