

## IRDM RGB

### DRAM MEMORY

#### Main Features

RGB Lighting  
High-speed DDR4 technology  
Capacity - 16 GB (2x8GB kit)  
3600 MHz frequency at 18-22-22 timings  
Carefully selected memory chips  
Lifetime warranty

DDR4 IRDM RGB memory is an ideal choice for anyone looking for a combination of performance and attractive design. RGB lighting, compatible with the software from leading motherboard manufacturers, guarantees smooth lighting effects and provides a visual experience of the highest level.

IRDM RGB modules are fully compatible with XMP profiles, which ensures the easy setting of recommended timings and latency. This, in turn, positively affects the performance and stability of products bearing the IRDM logo.

#### Specification

Module type	UDIMM DDR4 PC4-28800
Module capacity	8 GB
Kit capacity	16 GB
Frequency	3600MHz
Timings	18-22-22
Supply voltage	1,35 V
XMP	YES
PCB color	Black
Heatsink color	Black
Warranty	Lifetime
Cooling	Heatsink
Module lighting	YES
