

HANDSHAKE Mouse

Vertical grip, compact & flexible

Work Smart - Feel Good

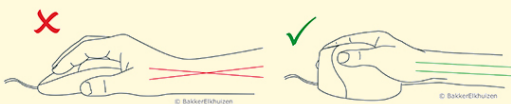

Vertical grip, compact & flexible

The HANDSHAKE Mouse encourages a more comfortable vertical grip, reducing muscle tension. It has two buttons and a scroll wheel.

The HANDSHAKE Mouse is designed for small and medium-sized hands (hand widths up to 3.5 inches excluding the thumb).

Thanks to the "handshake" position when using a vertical mouse the wrist doesn't bend sideways too much and the lower arm needs less inward rotation (Schmid et al., 2015). There is less muscle activity and therefore workload in the lower arm than with a standard mouse (Quemelo & Vieira, 2013).
