I-2. LED Status

LED Status	Description		
On	LED displays on for five seconds to indicate a successful WPS connection.		
Flashing	Wireless activity: transmitting or receiving data.		
Fast Flashing (3 x per second)	WPS is active.		
Off	No wireless activity.		

I-3. System Requirements

- Windows 7/8/8.1/10~, Mac OS 10.13~, Linux Kernel 2.6~4.15
- USB 2.0 Port
- Hard Disk: 100MB

I-4. Safety

In order to ensure the safe operation of the device and its users, please read and act in accordance with the following safety instructions.

- **1.** The wireless adapter is designed for indoor use only; do not place the wireless adapter outdoors.
- 2. Do not place the wireless adapter in or near hot/humid places, such as a kitchen or bathroom.
- **3.** The wireless adapter contains small parts that are a danger to small children under 3 years old. Please keep the wireless adapter out of reach of children.
- **4.** Do not place the wireless adapter on paper, cloth, or other flammable materials. The wireless adapter will become hot during use.
- **5.** There are no user-serviceable parts inside the wireless adapter. If you experience problems with the wireless adapter, please contact your dealer of purchase and ask for help.
- **6.** The wireless adapter is an electrical device and as such, if it becomes wet for any reason, stops using it immediately. Contact an experienced electrical technician for further help.

Download product material here <u>https://www.edimax.com/download</u>

1. Switch on your computer and insert the USB adapter into an available USB port of your computer.

Never use force to insert the USB adapter.

- 2. Please download driver from https://www.edimax.com/download
- **3.** If a Hardware Wizard/Driver Installation window opens as shown to the left, please click "Cancel" or "Close".

4. Please follow the instructions in the appropriate chapter for your operating system.

III. Windows

III-1. Driver Installation

If the auto wizard didn't run, please open the "AutoRun" folder and execute "Autorun.exe" file to start the setup wizard.

1. Please wait for the InstallShield Wizard to guide the entire setup process.

2. Click "Next" to install the drivers for your EW-7811Un V2.

3.Please wait while the driver is installing.

Edimax Wi-Fi N150 USB Adapter Driver	×
Setup Status	
Edimax Wi-Fi N150 USB Adapter Driver is configuring your new software in	stallation.
InstallShield	Cancel

4. Before you can use the wireless adapter, you need to restart your computer. When the installation is complete you will be asked to choose whether you wish to restart your computer now or later. Click "Finish" to continue.

5.After you restart your computer, your EW-7811Un V2 will be installed and fully functional. Please disable any other wireless adapters as described in V. Disabling Network Adapters. Then, Windows users can connect to an available Wi-Fi network as usual. For guidance on doing so, please refer to VI. Using The Adapter.

III-2. Driver Uninstallation

- III-2-1. Windows 7
- 1. Go to Start > Programs > Edimax Wireless LAN > Uninstall

2. Follow the on screen instructions. An uninstall wizard will guide you through the process.

III-2-2. Windows 8/8.1

1. Right click anywhere on the "Start" screen and then click the "All apps" icon in the bottom right corner.

2. Locate the Edimax Wireless LAN category, select "Uninstall" and follow the on-screen instructions.

III-2-3. Windows 10

1.Open WinX menu by holding Windows and X keys together, and then click "Programs and Features".

IV. Mac OS

IV-1. Driver Installation

Ensure you select the correct file for your version of Mac OS. To check your version of Mac OS, click the Apple logo in the top left corner of your desktop and go to "About This Mac".

- After downloading driver from https://www.edimax.com/download, open the "..._MacOS10.9_MacOS10.14_Driver_..." folder for your version of Mac OS X (10.9 - 10.14) and double click the "Install.pkg" file to open the driver installation wizard.
- **2.** Click "Continue" to proceed to the next step.

5.To read the software license click "Read License" and then click "Agree" to confirm you agree to the terms. You must agree to the terms to continue installing the software.

6.Click "Install" to install the driver.

7. You may be prompted to enter your system/administrative password before the installation can begin. Enter your password and click "Install Software".

Ω	Installer is trying to install new software.
	Enter your password to allow this.
	User Name: TS
	Password: ••••
	Cancel Install Software

8. You will be prompted that you must restart your computer when the installation is complete. Click "Continue Installation" to proceed.

9. Please wait while the driver is installing.

10. When the installation is complete, you will see the following screen informing you that "The installation was successful". Click "Restart" to restart your computer.

- **11.** When the adapter is connected to your computer (after your system has restarted) the wireless utility will open automatically.
- 12. Next, please disable any other wireless adapters as described in V. Disabling Network Adapters. Then Mac users can connect to a Wi-Fi network using the included utility software. For guidance on doing so, please refer to VI. Using The Adapter.

IV-2. Driver Uninstallation

Ensure you select the correct folder for your version of Mac OS. To check your version of Mac OS, click the Apple logo in the top left corner of your desktop and go to "About This Mac".

- 1.Open the "..._MacOS10.9_MacOS10.14_Driver_..." folder for your version of Mac OS X (10.9 10.14).
- **2.** Double click the "Uninstall.pkg" file and follow the on-screen instructions.

V. Disabling Network Adapters

To ensure that your USB wireless adapter can function correctly, it is recommended that you disable any other existing wireless network adapters installed on your computer. If you are unsure how to do so, you can refer to the user manual for your computer, or follow the guidance below.

V-1. Windows 7

Go to Start > Control Panel. Click View network status and tasks > Wireless Network Connection and click Disable.

Control Panel >	Network and Internet Network and Sharing Center

🕒 Data usage	Sharing options For the networks you connect to, decide what you want to share.		
Proxy	For the networks you connect to, becide what you want to share.		
	Network troubleshooter Diagnose and fix network problems.		

2.Right-click the network adapter, and select the "Disable" option.

V-4. Mac

1. Select "System Preferences" from the dock.

2. In "System Preferences", select "Network".

3.All of your network connections will be displayed, as shown below. Select "Wi-Fi" from the left panel.

4. Click "Turn Wi-Fi" off in the main panel.

VI. Using The Adapter

After you have installed the driver and if necessary disabled other wireless adapters (see **V. Disabling Network Adapters**), Windows users can connect to a Wi-Fi network as usual (see below). Mac users need to connect to a Wi-Fi network using the included utility software, as described in **VI-2. Mac**

VI-1. Windows

Below is an example of how to connect using Windows Vista - the process may vary slightly for other versions of Windows.

1. Click the network icon (examples below) in the system tray and select "Connect to a network".

2. Search for the SSID of your Wi-Fi network and then click "Connect". If you set a password for your network, you will then be prompted to enter it.

3. After correctly entering your password, you will be successfully connected to your Wi-Fi network.

VI-2. Mac: Connecting to a Wi-Fi network

1. The wireless utility will open automatically when the adapter is connected to your computer.

If the utility doesn't open, you can open it from the "Applications" menu in your Mac.

2. Click the "Available Network" tab in the wireless utility. Select a Wi-Fi network to connect to and click "Connect".

Refresh	Refresh the list of available wireless networks.
Connect	Connect to a selected wireless network.
Add to Profile	Use a selected wireless network to create a new profile (see VI-3-2. Profiles).

VI-3-4. WPS

	Link Status	Profiles	Available Network	WPS	Information
--	-------------	----------	-------------------	-----	-------------

Wi-Fi Protected Setup is a simple, alternative way to establish connections between WPS compatible devices. Most of the wireless router and access point feature a built-in WPS button, which activates WPS on that device. When WPS is activated in the correct manner and at the correct time for two compatible devices, they will automatically connect to each other.

WPS can also be activated via a device's web user interface, which has the same effect as physically pushing the WPS button (known as PBC or "push button configuration").

PIN code WPS is an additional variation of WPS which can be activated from a device's web user interface, and includes the use of a PIN code between the two devices for identification and verification.

The "WPS" page displays information about Wireless Protected Setup (WPS), including a list of available WPS routers or access points. Instructions to set up PBC WPS and PIN code WPS are included below, followed by a description of each item on this page:

SSID	Channel	Security	BSSID	
I?LTLin-2.4G	2	WPA2-PSK AES		
	-			
OBM-SMB-2.4G	6	WPA(2)-PSK AES		
EDIMAX	11	No Encryption	801f023c0e66	
2.4G testing	13	No Encryption	801f0289c13c	
OBM-AirPort	6	WPA(2)-PSK AES	801f0288122a	
SCAN	Please key the PIN co PIN: 57099071	de into your AP's cor	ifig page	PIN PBC
				Cancel

PBC: Push Button Configuration

The EW-7811Un V2 does not feature a physical WPS button, but PBC WPS can be executed from this page by following the steps below:

1. Press the WPS button on your **wireless router/access point** for the correct length of time to activate its WPS.

Please check the instructions for your wireless device for how long you need to hold down its WPS button to activate WPS.

2. Within two minutes, click the "PBC" button in the bottom left of the "WPS" page. The wireless adapter will establish a connection with your wireless router/access point.

PIN Code WPS

PIN code WPS includes the additional use of a PIN code between devices. This is useful for identification and verification purposes in crowded wireless environments with multiple routers/access points/wireless devices.

1. The wireless adapter's PIN code is listed in the lower centre of the "WPS" page next to "PIN". Go to your wireless router/access point's web user interface and input the wireless adapter's PIN code in the correct location, and activate PIN code WPS for your wireless router/adapter.

Please key the PIN code into your AP's config page PIN: 57099071 **2.** Within two minutes, select your wireless/router/access point from the "SSID" list as shown below, and then click the "PIN" button in the bottom left of the "WPS" page. The wireless adapter will establish a connection with your wireless router/access point.

SSID	Channel	Security	BSSID
!?LTLin-2.4G	2	WPA2-PSK AES	801f0275e723
OBM-SMB-2.4G	6	WPA(2)-PSK AES	106f3fd00a40
EDIMAX	11	No Encryption	801f023c0e66
2.4G testing	13	No Encryption	801f0289c13c
OBM-AirPort	6	WPA(2)-PSK AES	801f0288122a

Below is a general description of items on the "WPS" page:

Scan	Refresh the list of available wireless networks.
PIN	Activate PIN code WPS on the wireless adapter for two
	minutes.
РВС	Activate Push Button Configuration (PBC) WPS on the wireless adapter for two minutes.

VI-3-5. Information

-{	Link Status	Profiles	Available Network	WPS	Information

The "Information" screen displays various information such as wireless utility version and driver version.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient or relocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver.
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio technician for help.

FCC Caution

This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the authority to operate equipment.

Federal Communications Commission (FCC) Radiation Exposure Statement

This equipment complies with FCC radiation exposure set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 0.5cm during normal operation.

Federal Communications Commission (FCC) RF Exposure Requirements

SAR compliance has been established in the laptop computer(s) configurations with PCMCIA slot on the side near the center, as tested in the application for certification, and can be used in laptop computer(s) with substantially similar physical dimensions, construction, and electrical and RF characteristics. Use in other devices such as PDAs or lap pads is not authorized. This transmitter is restricted for use with the specific antenna tested in the application for certification. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

RED Compliance Statement

Compliance with 2014/53/EU Radio Equipment Directive (RED)

In accordance with Article 10.8(a) and 10.8(b) of the RED, the following table provides information on the frequency bands used and the maximum RF transmit power of the product for sale in the EU:

Frequency range (MHz)	Max. Transmit Power (dBm)
2412-2472	15.03

A simplified DoC shall be provided as follows: Article 10(9)

Hereby, Edimax Technology Co., Ltd. declares that the radio equipment type **N150 Wi-Fi Nano USB Adapter** is in compliance with Directive 2014/53/EU

The full text of the EU declaration of conformity is available at the following internet address: <u>http://www.edimax.com/edimax/global/</u>

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

Safety

This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacture must therefore be allowed at all times to ensure the safe use of the equipment.
