INSTALLATION
1. Take out the mini USB receiver.

2. Plug the USB receiver into USB port.

3. Operate the wireless presenter.
4. Turn off the wireless presenter.

Turn off the power switch

CHARGING THE WIRELESS PRESENTER
1. LOW POWER INDICATION
   When the power is low, the red LED will flash slowly to remind the user to recharge the wireless presenter.
2. RECHARGING THE WIRELESS PRESENTER
   Connect the wireless presenter to a USB port, the red LED will stop flashing and keep red to show the wireless presenter is being recharged. If the red LED turns off, it means the recharge is completed. Normally the recharging time is about two hours.

FREQUENTLY ASKED QUESTIONS

1. How to know the battery is out of power?
Turn on the power switch of the presenter, then press laser button to check if the laser can be turned on. If the laser cannot be turned on, usually it means the battery is out of power or the laser diode is broken and need replacement.
In other case, if the LED on the wireless presenter starts to flash slowly, it means the power is low and the battery needs to be recharged.

2. Why does the laser pointer not work?
First, check the power switch. Second, check whether the wireless presenter is in low power or out of power. If the LED flashes slowly, it means the power is low and the battery needs to be recharged. If all the other buttons can work, only the laser pointer cannot work, the laser diode may need replacement. Third, check the place of anode and cathode of battery. Before putting a battery into the presenter, remember to remove the plastic cover of the battery.

3. When the mini USB receiver plugs into the PC USB, the computer does not detect the device, why?
Please check whether the USB works or not. You can use a USB mouse or keyboard to test the USB port. If a USB mouse or keyboard works on the USB port and the USB receiver of the presenter doesn't, it means the USB receiver of the presenter is broken or the USB drivers is not compatible with the USB receiver. You can try another USB port of the same computer or USB ports of another computer to check whether the USB receiver of the presenter is working. If it works on other computer, it means the USB drivers of the computer are not compatible with the USB receiver. You need to back up your data and reinstall the OS.

4. The laser is ok and the USB receiver can be detected by the computer, but the presenter cannot control the computer, why?
The reason is the USB receiver doesn't save the presenter's address properly. You can use a CodeMatch software to let the USB receiver to save the presenter's address again.

SPECIFICATIONS

TRANSMITTER
Technology:	Radio Frequency
Frequency:	2.4GHz
Control Distance:	>100m
Laser:	Class 2M
Max Output:	<1mW
Laser Distance:	>200m
Wavelength:	650nm/532nm
Battery:	360mAh Polymer Lithium Battery
Working Voltage:	3.7V
Sleep Current	<10uA
Dimension:	138 x 18 x 13 mm
Weight:	32.1g

USB RECEIVER
Working Voltage:	5V DC
Dimension:	24.7 x 13.8 x 5.14 mm
Weight:	1.9g

FUNCTION DESCRIPTION
1. Press and hold "Laser Pointer" button to turn on the laser, release button to turn it off.
2. Use the Microsoft PowerPoint to open PowerPoint files.
3. Press "Page Up" button for 2 seconds to Start a slideshow from the current slide. Press the button for 2 seconds again to escape from the full screen.
4. Press "Page Down" button and "Page Up" button to go forward and backward.
5. Press "Page Down" button for 2 seconds to enter into black screen. Press "Page Down" button for 2 seconds again to escape.

Note: When you press "Page Down" button for 2 seconds to enter the black screen, the USB receiver will send the letter 'b' or comma ',' to the PowerPoint. If the Input Method Editor is open, the letter 'b' or comma',' will be intercepted and cannot be sent to the PowerPoint. In this case, try to turn off the IME or switch to the English input mode.

6. If hyperlinks exist on the page, click ☐ button, you can jump among the hyperlinks and double click ☐ can be used to open the hyperlink. To click ☐ is same as to press Tab on keyboard. To double click ☐ is same as to press Enter on keyboard. For WPS doesn't support jumping hyperlinks by Tab, so WPS doesn't support this function.

7. After the hyperlink is opened, you can press and hold ☐ button to switch between all opened application windows. Release it to turn to the window you want to switch to. To press and hold ☐ button is same as to press Alt-Tab on keyboard.
8. The presenter supports PowerPoint, Keynote and Prezi by switching the functions of the page down/up buttons. By default, the page down/up buttons of the presenter function as the Up/Down Arrow on keyboard, which can support PowerPoint and Keynote. By pressing the page down/up buttons at the same time, the function will change to the left and right arrows on the keyboard for Prezi support. Doing it a second time changes the function to page up and down, which supports many other programs. Pressing them together a third time will revert back to the default setting.
9. Press "volume up" or "volume down" on the side, you can adjust system volume.
