# SLIM DOCK FOR IMAC 24"

1

Connect the Hub to one of your iMac's Thunderbolt ports by connecting to the "HOST" port on the dock, using the included USB-C cable.
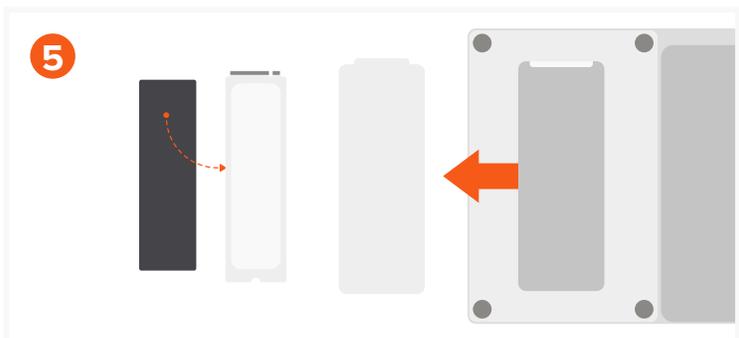

2

Connect a USB-C drive or peripheral to the USB-C data port (up to 10 Gbps).
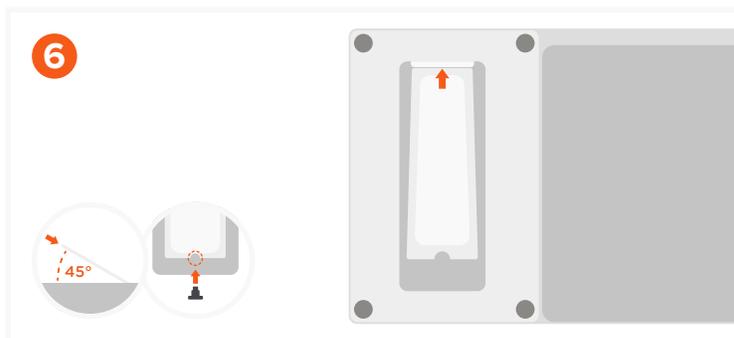

Does not support charging or video.

3

Use the USB-A data port to connect USB devices up to 10 Gbps.

Does not support charging or CD readers, including Apple USB SuperDrive.

4

Insert micro or SD cards into card reader slots.

Supports UHS-I speeds.

5

To install the SSD, lift the backside cover on the adapter. Apply the Thermal Pad included to the bottom of the SSD. Ensure pad is properly aligned.

6

Insert the SSD *(not included)* faceup at a 45-degree angle. Once installed, push down on the SSD and use the silicone pin to keep it in place.

Supports NVMe & SATA (up to 10Gbps max speed, 2TB max capacity)

7

Once the SSD is secured, magnetize the cover back onto the hub.

8

Use 2 USB 2.0 data ports (480Mbps) on the back of the hub to connect USB devices.

Does not support charging or CD readers, including Apple USB SuperDrive.
