# Quick Installation Guide

LTE-Advanced Mobile Wi-Fi

Install the SIM Card and Battery
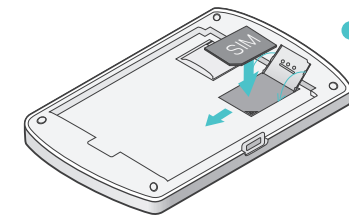

1 Remove the back cover.
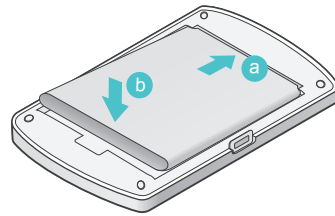

2 Slide and lift up the SIM card slot cover.

**3** Insert the SIM card and slide the cover back to lock.

❶ • A nano SIM card must be converted using the provided SIM card tray.
• The micro SD card slot can be used for storage and media sharing.
• The SIM card and SD card are not provided.

**4** Install the provided battery.

5 Replace the cover.

Connect to the Internet

1 Press and hold the ⏻ button until the welcome screen appears.

❶ To power off, press and hold the ⏻ button until the "Power Off" message appears on the screen.

2 You will find the following messages on the screen, and then follow the instructions to connect to the Mobile Wi-Fi.

0MB
0.0K/s
Carrier Name

Press the ☰ button twice and then press the ⏻ button to select **Device Info**. Use the **SSID** and **Password** shown on the screen to connect to your Mobile Wi-Fi.

# Charging Your Mobile Wi-Fi

Method 1
Via a Wall Outlet (Recommended)

5V/1A
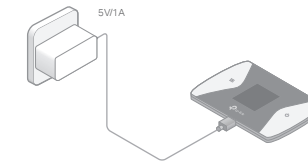

Method 2
Via a Computer

ⓘ • When ⚡ on the battery icon disappears, the Mobile Wi-Fi is fully charged.
   • The power adapter is not provided by TP-Link.

FAQ (Frequently Asked Questions)

Q1. Is there any alternative to manage the Mobile Wi-Fi besides the tpMiFi app?
A. You can manage the Mobile Wi-Fi by using its web management page.
1. Connect your wireless device to the Mobile Wi-Fi.
2. Launch a web browser and enter http://tplinkmifi.net or http://192.168.0.1 in to the address bar. Enter **admin** for the Password, and then click **Login**.

Q2. What should I do if I cannot log in to the web management page?
A1. Verify that your device is connected to the Mobile Wi-Fi.
A2. Verify that you have entered http://tplinkmifi.net or http://192.168.0.1 correctly.
A3. Verify that your device is set to obtain an IP address automatically.

Q3. What should I do when one of the following messages appears on the screen or I cannot access the internet?
A1. PIN Required
▪ Log in to the web management page. Enter the PIN code provided your mobile carrier, and click **Done**.
A2. No SIM Card
▪ Power off the Mobile Wi-Fi and reinstall your SIM card.

A3. No Service
▪ Verify that your SIM card is an LTE , UMTS or GSM SIM card;
▪ Verify that your SIM card is in your mobile carrier's service area and has sufficient credit;
▪ Verify that your mobile carrier parameters are correct:
On your phone, log in to the web management page, go to **Dial-up** > **Dial-up Settings** to verify that APN (Access Point Name), Username and Password are correct. If not, click **Create** to create a new profile with the correct information and click **Save**.
A4. Ⓡ icon
▪ Press the ☰ and ⏻ buttons to select **Data Roaming**, and then turn on **Data Roaming**.

Q4. What should I do if my internet speed is slow?
A1. If you are experiencing intermittent slow internet connection, you can go to **Wi-Fi Band** on the screen to switch between 2.4GHz and 5GHz band for better connectivity.
A2. The 4G network may be temporarily unavailable in your current location. From the Menu screen, go to **Network Mode** and try a different network.

Q5. How do I restore the Mobile Wi-Fi to its factory default settings?
A. With the Mobile Wi-Fi powered on, remove the back cover, and then use a pin to press and hold the **reset** button until "**Power Off**" appears on the screen.
Note: Restoring the Mobile Wi-Fi to its factory defaults will clear all previous settings and you have to reconfigure them.
