Applications

Measures DC mA signals used in industrial automation equipment, PLC, transmitters, process control and analog I/O systems without breaking the loop. Kew 2500 is ideal for measuring the level of 4-20 mA signals correlating process indication with real physical value. Very useful to maintain and troubleshoot process and automation equipment without breaking the loop and stopping the process.

Analog output terminal for recorder connection

Note: The Auto-power OFF can be disabled for long recording

Dual display gives simultaneous readout of % values and measured values(mA)
