Highlights

Unique OneBlade Technology

Philips OneBlade has revolutionary technology designed for facial grooming. It can shave any length of hair. Its dual-protection system—a glide coating combined with rounded tips—makes shaving easier and more comfortable. Its shaving technology features a fast-moving cutter (12000 x per min) so it's efficient - even on longer hairs.

Innovative 360 blade

The innovative 360 Blade can flex in all directions to adjust to the curves of your face. The design enables constant skin contact and control. Easily trim and shave hard-to-reach areas — with few strokes and great comfort.*

Trim it down

Trim your beard to an even length with the included adjustable precision comb. Dial up one of the 14 lock-in length settings to get everything from a 5 o'clock shadow, to a tight trim, to a longer beard style.

Edge it up

Create precise edges with the dual-sided blade. You can shave in either direction to get great visibility and see every hair that you're cutting. Line up your style in seconds!

Shave it off

OneBlade does not shave as close as a traditional blade - so your skin stays comfortable. Go against the grain and easily shave off any length of hair on your face or body. Includes two blades - one for face and one for body.

Click-on body comb

Attach the body comb (3 mm) for an easy trim in any direction.

Click-on skin guard

Attach the skin guard for an extra layer of protection on sensitive areas.

Dual-sided blade

OneBlade follows the contours of your face, allowing you to easily and comfortably shave all areas. Use the dual-sided blade to style your edges and create clean lines by moving the blade in any direction.

Blade that doesn't become blunt easily

Stainless steel blade that lasts up to 4 months of use ** to keep that fresh feel. When the eject icon appears on the blade, the blade performance may no longer be optimal. It is time to consider changing the blade for the best shaving experience
