

Garett Kids Sun Pro 4G

User manual

Thank you for purchasing Kids Sun Pro 4G

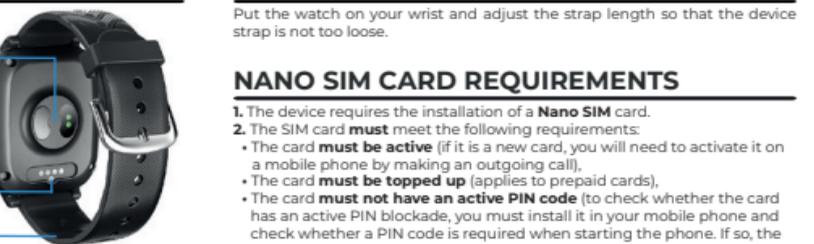

SAFETY ISSUES

Please read this manual carefully before use and keep it for future reference. The manufacturer shall bear no liability for any damage/injuries caused by improper use. Depending on the smartwatch batch, certain functions may differ from the functions described in this user manual.

- Using this device near medical devices may disrupt their operation. Users should pay particular attention when using the smartwatch near medical devices such as pacemakers, hearing aids, and other electronic medical devices.
- Do not dispose of the device in fire. There is a risk of the batteries exploding and the resulting threat to life and health.
- Protect the device from heat sources and direct sunlight.
- Do not store the device in damp places or at high temperatures, as this may cause electric shock or fire.
- The device is not resistant to prolonged immersion in water.
- Do not swim or dive while wearing the device.
- In case of damage/failure, please stop using the product and contact the Garrett service centre. Attempting to repair it yourself may damage the device and void the warranty.
- Clean the device only with a soft, slightly damp cloth. Do not use strong detergents or any other stimulants to clean the product.

Do not swim while wearing the device. The IP67 standard does not guarantee that the smartwatch will be waterproof while swimming. The forces acting on the device while swimming may cause it to become unsealed and damaged.

PRODUCT DESCRIPTION

1. Touchscreen display
2. Nano SIM card slot
3. Touch back button
4. Photo/video camera
5. Torch
6. Measuring sensor set
7. Function button (On/Off/Wake/Lock screen/SOS)
8. Magnetic charging port
9. Interchangeable strap

INSTALLATION

Put the watch on your wrist and adjust the strap length so that the device strap is not too loose.

NANO SIM CARD REQUIREMENTS

1. The device requires the installation of a **Nano SIM** card.
2. The SIM card **must** meet the following requirements:
 - The card **must be active** (if it is a new card, you will need to activate it on a mobile phone by making an outgoing call).
 - The card **must be topped up** (applies to prepaid cards).
 - The card **must not have an active PIN code** (to check whether the card has an active PIN blockade, you must install it in your mobile phone and check whether a PIN code is required when starting the phone. If so, the PIN lock is active and will need to be disabled in the phone settings or by contacting the operator).
 - The card **must support 2G/3G/4G operating modes, have Internet service enabled, and have a Number Identification function.**

SIM cards offered by operators as data-only, e.g. those designed for tablets, may not function properly in the device.

OPERATION

Press and hold the **function key(7)** for approximately **3 seconds** to start the device. To switch it off, go to **Settings>Off**.
 Ⓜ If the smartwatch does not start, try charging it.

After starting

The smartwatch is operated via the **screen** and a **touch button**, as well as a **function button**.

INSTALLING THE NANO SIM CARD

1. First, remove the screws securing the **Nano SIM(2)** card port cover located on the left side of the watch.
2. Remove the cap and then place the card in the port, inserting it according to the illustrative diagram in the picture, **i.e., with the card chip towards the display and the notched corner of the card towards the slot.**
3. A properly installed SIM card will make a distinctive "click" sound. Gently push it towards the slot to **remove** the card until you hear a "click". The mechanism will **automatically** eject the SIM card.
4. Replace and screw on the cover, **taking care to ensure the correct fit and location.**

Install the SIM card when the device is turned off.

SIM cards offered by operators as data-only, e.g. those designed for tablets, may not function properly in the device.

OPERATION

Press and hold the **function key(7)** for approximately **3 seconds** to start the device. To switch it off, go to **Settings>Off**.
 Ⓜ If the smartwatch does not start, try charging it.

After starting

The smartwatch is operated via the **screen** and a **touch button**, as well as a **function button**.

CHANGING THE WATCH FACE

Touch and hold the home screen to display the smartwatch **face change menu**. **Swipe right/left** to select the face, and then **click** anywhere on the screen to confirm your selection.

Navigation

Swipe right on the home screen to access the **main menu**. Touch the screen to enter the selected function. After entering a function, swiping to the right or tapping the **touch return key(3)** allows you to return to the previous screen while pressing the **function key(7)** takes you to the main screen.
Swipe left on the home screen to access the **App Market**, a menu for installing additional apps on your smartwatch.

Swipe down on the home screen or the menu to access the **settings bar**. Allows you to view selected functions of the smartwatch, and if you **swipe to the right**, view **recent notifications**.

Swipe up on the home screen or menu to access the **settings menu**. Allows you to view and quickly change selected smartwatch functions.

CHARGING

1. The smartwatch charges using the **magnetic cable** included with the device.
2. Attach the end of the magnetic cable so that **the contacts of the watch touch the contacts of the charging cable**. Then connect the other end of the cable to the USB port of a computer or a USB power adapter. **When it is connected properly, the charging animation will appear on the watch screen.**

INSTALLING THE GARETT TRACKER APP

The smartwatch works with your smartphone using the **Garrett Tracker** app. Before use, you must first download the app from the Google Play Store or the AppStore and install it on your phone. You can find the app by entering the name **"Garrett Tracker"** in the store search engine or scanning the corresponding QR code provided below.

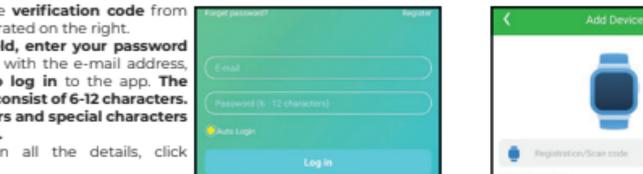

Please remember to grant the app the required consent and permission before registration to work correctly. If you refuse, selected functions of the app may not work properly or will be unavailable.

INITIAL START-UP

1. When the **Nano SIM card** is installed correctly in the watch and meets all the requirements described above, start the device by **pressing and holding the function button(7)** for approximately **3 seconds**.

4G+ - internet connection
4G - GSM coverage
Wi-Fi - Wi-Fi coverage
69% - battery level

2. After starting the watch, the **home screen** will appear, displaying the time and date. **Swiping down** on the main screen or menu will display: **the internet connection, GSM coverage, WiFi signal, and battery level.**

Please remember or note down the e-mail address and password used to register the watch, because the account to which the device was first assigned is the administrator's account. Re-registration will be possible only after obtaining permission from the administrator or after contacting our Technical Support Department: serwis@garett.pl

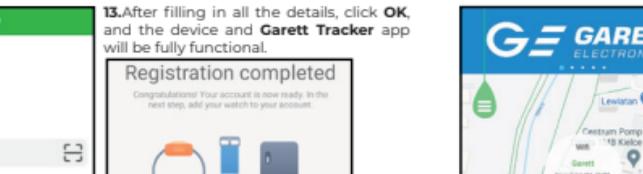

8. Then press the **Add Device** button to add the watch to the previously created account.

9. On the next screen, scan the **QR code** using the button **(REG CODE)** from the sticker on the back of the watch (or in the watch settings. The code can be also entered manually).

10. Enter the **device name**, and it will be displayed as the name of the device associated with your account.

11. The next step is to choose your **relationship** with the user of the smartwatch.

12. Optionally, enter the **phone number** of the device, which will facilitate communication.

In the event of any problems with registration of the device, please contact our Technical Support Department: serwis@garett.pl

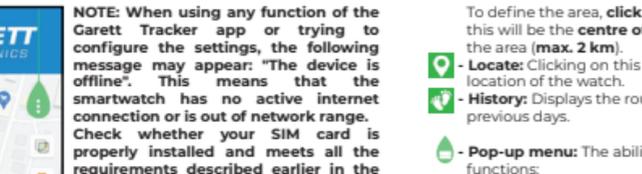

13. After filling in all the details, click **OK**, and the device and **Garrett Tracker** app will be fully functional.

GARETT TRACKER APP

After completing the registration and adding the device, the home screen of the app will be displayed, showing the map with the last **watch location**. The bubble over the pin specifying the location displays the source of location data (**GPS/LBS/WiFi**), **address, time of the last location** and **watch battery level**.

Chat: The ability to send short voice messages (**max. 15 seconds**), short text messages (**max. 30 characters**) and photos to the watch.

GEO-fence: This function lets you define the area in which the watch user may move around. The app will inform you when the user crosses the geofence.

NOTE: When using any function of the Garrett Tracker app or trying to configure the settings, the following message may appear: "The device is offline". This means that the smartwatch has no active internet connection or is out of network range. Check whether your SIM card is properly installed and meets all the requirements described earlier in the manual. If the SIM card is properly installed and meets the criteria described, the lack of signal may be due to an incorrect APN configuration. The way to get the proper APN configuration is described later in the manual in the TROUBLESHOOTING section.

Chat: The ability to send short voice messages (**max. 15 seconds**), short text messages (**max. 30 characters**) and photos to the watch.

GEO-fence: This function lets you define the area in which the watch user may move around. The app will inform you when the user crosses the geofence.

Alarms: View and configure the alarms active on the device (**max. 3**).

Notifications: History of recent notifications, e.g. SOS calls, low battery.

Rewards: Reward system – each reward is one heart. The total number of rewards is displayed on the home screen of the watch.

Device lock: The ability to restrict the functionalities of the watch to SOS calls only.

SOS numbers: Configure SOS numbers (**max. 3**). Pressing and holding the SOS button on the watch will call the first number. If the call is unsuccessful, the watch will automatically dial the second and then the third number. If the SOS call is answered by the voicemail active on one of the SOS numbers, it will not be redirected to the next number.

Settings: The ability to display and configure the functions: SOS family number, Voice monitoring, Night-time battery saving mode, SMS messages.

PERSONAL DETAILS

- Profile:** Configure the personal details of the account administrator.
- Device list:** The ability to display and add/edit associated devices. By clicking on a device name, you can change its details. The **Switch** option allows you to switch the active device, i.e. the one being currently tracked. To remove a watch from the list, select **Edit>Delete**.
- Change password:** Change the password used in the app.
- Log out:** Log out of the app.

POP-UP MENU

- Whitelist:** Incoming call filtering – it means that only the numbers on the Whitelist and that have been previously saved in the phone book will be able to get through to the watch.
- Timetable:** Configure the timetable that can be displayed on the watch under Learning>Timetable.
- Remote camera:** Take a photo using the watch camera and send it to the app.
- Activity:** Configuration and display of the activities performed by the watch user, up to several days back.
- Video chat:** The ability to make video calls between the administrator and the associated watch.

Due to the large amount of data transmitted during a video call, a high-bandwidth internet connection is required. LTE connection is recommended. In locations with poor mobile network coverage, such as areas outside cities or towns, shopping malls or underground car parks, making video calls may not be possible, or the calls may be of poor quality with interruptions in video transmission.

Change map view: The ability to change the map style.

Phone location: Indicates the current location of the phone on which the app is launched.

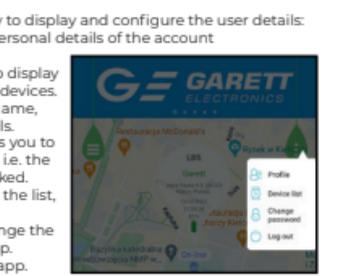

Device location: Indicates on the map the location of all associated devices in the app.

Switch: Quickly switch between associated devices.

SOS numbers: Configure SOS numbers (**max. 3**). Pressing and holding the SOS button on the watch will call the first number. If the call is unsuccessful, the watch will automatically dial the second and then the third number. If the SOS call is answered by the voicemail active on one of the SOS numbers, it will not be redirected to the next number.

Settings: The ability to display and configure the functions: SOS family number, Voice monitoring, Night-time battery saving mode, SMS messages.

Change password: Change the password used in the app.

Change map view: The ability to change the map style.

Phone location: Indicates the current location of the phone on which the app is launched.

Device location: Indicates on the map the location of all associated devices in the app.

Switch: Quickly switch between associated devices.

SOS numbers: Configure SOS numbers (**max. 3**). Pressing and holding the SOS button on the watch will call the first number. If the call is unsuccessful, the watch will automatically dial the second and then the third number. If the SOS call is answered by the voicemail active on one of the SOS numbers, it will not be redirected to the next number.

Settings: The ability to display and configure the functions: SOS family number, Voice monitoring, Night-time battery saving mode, SMS messages.

Change password: Change the password used in the app.

The SOS function is active only within range of the network, has an internet connection, and the account is sufficiently topped up.

Voice monitoring: Remote voice monitoring. Enter a phone number to activate the function. The watch will automatically call back the phone number entered within 30 seconds. The watch

When configuring the SOS Numbers function – and Voice monitor – enter the numbers without the country code (if necessary, add 0048 before the number for PL). Using the "+" symbol may prevent calls from being made.

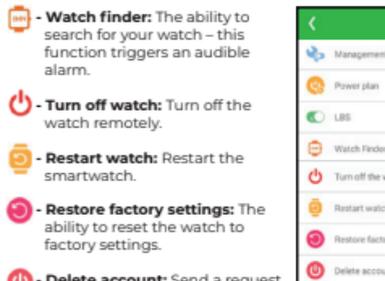

Night-time battery saving mode: Ability to activate/deactivate the battery saving mode, which limits the network functions of the watch between 22:00 and 6:00 (extends the operating time of the watch).

SMS messages: The ability to read SMS messages sent to the number on the watch.

Body temperature: Ability to perform a remote temperature measurement (automatic or unitary - at a set time), display the measurement history or change the temperature unit. Additionally, the administrator will receive an SMS message when the measured temperature value exceeds the set range with the SMS notification function.

Operating modes: Select the refresh frequency of the watch location:
• **Tracking mode** - refreshing every 1 minute (shortens the running time of the watch).
• **Normal mode** - refresh every 10 minutes.
• **Battery saving mode** - refreshes every hour.
• **Sleep mode** - manual positioning.

LBS: The ability to turn on/off the tracking function of the watch based on the nearest mobile network transmitter, in the event that the watch loses GPS signal.

Watch finder: The ability to search for your watch – this function triggers an audible alarm.

Turn off watch: Turn off the watch remotely.

Restart watch: Restart the smartwatch.

Restore factory settings: The ability to reset the watch to factory settings.

Delete account: Send a request to delete the account from the app server. The account should be deleted within one hour.

Wi-Fi settings: Configure the Wi-Fi network that the watch connects to automatically, without entering a password.

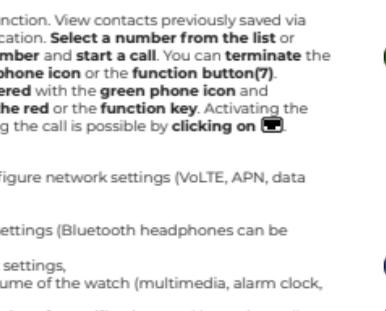

Time zone: Configure the time zone of the watch (PL: East +1:00).

Language: The option to change the language of the smartwatch.

Management:
• **Numeric keypad:** Enable/disable the numeric keypad function on the watch. Turning on this function allows the watch user to dial and make a call to any number (including those not entered in the phone book). If you do not want the watch user to be able to contact numbers not entered in the phone book, turn this function off.
• **GPS positioning:** Option to enable/disable the watch's positioning function via GPS.

Power plan: Schedule your watch to turn on or off.

LBS: The ability to turn on/off the tracking function of the watch based on the nearest mobile network transmitter, in the event that the watch loses GPS signal.

Contacts: Phonebook function. View contacts previously saved via the Garrett Tracker application. Select a number from the list or click + to enter the number and start a call. You can terminate the call by pressing the red phone icon or the function button(7). Incoming calls are answered with the green phone icon and similarly rejected with the red or the function key. Activating the numerical keypad during the call is possible by clicking on [OK].

Settings:
• **Mobile networks:** Configure network settings (VoLTE, APN, data roaming).
• **WiFi:** WiFi settings.
• **Bluetooth:** Bluetooth settings (Bluetooth headphones can be paired).
• **Lock:** Smartwatch lock settings.
• **Volume:** Adjust the volume of the watch (multimedia, alarm clock, ringtone).
• **Ringtone:** Ringtone settings for notifications and incoming calls.
• **Brightness:** Adjusts the brightness level of the display.
• **Torch:** Torch function in the watch.
• **Menu style:** Change the style of the main menu.
• **Theme:** Change the theme (background) of the main menu.
• **Sleep:** Configuration of screen blanking time (from 5 seconds to 30 minutes).
• **Restart:** Restart your watch.
• **Turn off:** Turn off the device.
• **Tools:** Additional functions for managing the device memory (clearing and viewing data on the watch).
• **More:** Device information (water removal, device information, SIM lock settings, date/time and language settings).

Call history: Call history function. The possibility of displaying the exact date and time of the last voice calls.

Video call: Video calls function. Possibility of making video calls between the administrator and the associated watch. Group chat also available. Select a person and confirm the call to start. You can terminate the call by pressing the red phone icon or the function button(7). Incoming calls are answered with the green phone icon and similarly rejected with the red or the function key. Due to the large amount of data transferred during a video call, a high-speed internet connection is required, so an LTE or WiFi connection is recommended. For locations with poor mobile network coverage, such as out-of-town areas, shopping malls or underground car parks, it may not be possible to make a video call or it will be of poor quality with interruptions in video transmission.

Stopwatch: Stopwatch function.

Lock:
• **Screen lock:** Possibility of adding a PIN code or password as a screen lock. Enter your PIN/password, repeat it, and then confirm to add a new lock. The entered data will be required each time you try to unlock your watch. This function protects against unauthorised access to the smartwatch - Level I.
• **FaceUnlock:** Face unlock function + PIN/password. Enter the PIN/password to activate the function, repeat and confirm. Then scan your face in the add face menu (it appears automatically after entering and confirming your PIN/password). Hold the watch in front of your face and move it according to the messages displayed on the smartwatch until the scanning is complete (100%). The image of the scanned face will be used to unlock the screen. This function protects against unauthorised access to the smartwatch - Level II.

Dictaphone: Voice recorder function. Press [M] to start recording, then [M] to pause or stop.

Camcorder: Camera function. Record video with the watch's built-in camera. To start recording, click [M]. The video will be saved in the device gallery (Video).

Thermometer: Thermometer function. Allows you to take temperature measurements, change the unit and view recent measurements. Two modes are available:
• **Wrist:** Click Start to start a quick measurement of your current body temperature. When the measurement is complete, you will hear a beep; the result will be displayed on the watch screen (also available under the History button) and saved in the Garrett Tracker app under Settings>Body Temperature.
• **Real-time measurement:** Automatic continuous measurement function. The temperature reading will change constantly

SMS: SMS function. Allows you to send/receive SMS messages. Tap [M] to start creating a new message. Enter your phone number or click [M] and select a previously saved contact from the Garrett Tracker application in the first field. In the second field, enter the content of the message you want to forward. Press the return touch button(3) to exit the keyboard view when finished. Click [M] to send your message. Messages sent/received will be available

Camera: Camera function. Take photos with the watch's built-in camera. To take a photo, click [M]. The photo will be saved in the device's gallery. It is possible to send a photo to the watch administrator from the Smartwatch Gallery - click [M], then select a photo from the gallery and hold it down to send. It will appear in the Garrett Tracker app under the Remote Camera tab.

Gallery: The watch's gallery function. Possibility of viewing, deleting and sending photos. To delete, press [M]. To send, press and hold the photo, then give permission for the photo to be transferred. It will appear in the Garrett Tracker app under the Remote Camera tab.

Learning:
• **Game:** A simple maths game.
• **Timetable:** Ability to view a pre-configured timetable in the Garrett Tracker app.

Pedometer: Pedometer function. Displays the number of steps you have taken. Option to enable/disable this function in the Garrett Tracker app under Activity>Pedometer>Measurement.

App Store: Ability to install additional features on the watch.

QR Code: Displays the REG CODE and QR code to download the Garrett Tracker app.

Alarm: Possibility of viewing a pre-configured alarm clock in the Garrett Tracker app.

Video: Watch video gallery function. Possibility of viewing deleting and uploading videos. Select a video to start playing. Click [M] to send to the watch administrator, click [M] to send via Bluetooth.

Content of the first text message:
pw,123456,ts#

After a while, you should receive a response to your phone containing detailed information about the watch, i.e. the software version, ID, IMEI, IP address and other information. For the watch to work properly, the ip_url field must contain:
ip_url:52.28.132.157; port:8001;

If the ip_url field differs from the example provided, please contact our Technical Support Department: serwis@garett.pl

FaceUnlock can be enhanced with an additional feature - EyeUnlock. It is an unlocking function using a single eye blink. It prevents unlocking using e.g. a photo. To activate the feature, go to FaceUnlock settings and select EyeUnlock (no need to scan your face again). Once approved, unlocking the screen using your face will only be possible after blinking your eyes. This function protects against unauthorised access to the smartwatch - Level III.

Health: Function for measuring health parameters (Pulse, Blood Pressure, Blood Oxygen). Click START to begin the measurement. The values for all 3 health functions are measured simultaneously. The result will be displayed on the watch screen and stored in the Garrett Tracker app under Activity>Blood Pressure/Pulse when the measurement is complete.
